PROFESSIONAL SUMMARY

Final-year Integrated MCA student with a strong foundation in software development, mobile applications, REST APIs, Firebase, and Salesforce CRM. Experienced in developing technology solutions through academic and personal projects, with an ability to understand user requirements and solve technical problems. Interested in B2B software sales, SaaS, IT consulting, and business solution consulting, with strong communication, presentation, problem-solving, and client-focused skills. Eager to apply technical knowledge to understand business challenges, recommend suitable technology solutions, and contribute to business development.

TECHNICAL SKILLS

Programming Frameworks: Java, C, HTML/CSS, PHP, Dart, Flutter
Business Communication Skills: Verbal Written Communication, Interpersonal Skills, Negotiation, Customer Relationship Management (CRM), Customer Engagement, Sales Business Development, Requirement Analysis, Problem Solving, Target Orientation, Follow-up Management, Lead Management, Client Handling, Presentation Skills
CRM Sales Tools: Salesforce CRM, CRM Data Management, Customer Interaction Tracking, Sales Pipeline Management, Lead Management, Lead Conversion, Configuration, Customization, SOQL, Security, Flows
Technical Proficiency: Firebase, Firestore, Firebase Authentication, RESTful APIs, SQLite, Google Maps API, Git, GitHub, Mobile Application Development, Software Product Understanding, Technical Problem Solving, Data Structures Algorithms, Linux, Bash Scripting, SQL
Tools Platforms: Salesforce CRM, Jira, Git, GitHub, Android Studio, Visual Studio Code, Postman, Google AdMob
Core Competencies: Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Agile Methodology, Network Protocols, Requirement Understanding, Solution-Oriented Thinking

PROJECTS

SOC Automation **11/2025**
Wazuh, TheHive, Shuffle, VirusTotal API

- Developed a Security Operations Center automation workflow focused on incident-response automation and streamlined security-event handling.
- Automated alert ingestion, IOC enrichment, and incident escalation through API integrations and SOAR playbooks.
- Integrated security tools and automated workflows to improve the consistency and efficiency of incident-analysis processes.
- Reduced manual incident-triage and analysis time by approximately **60%** through workflow automation and automated enrichment.

PinkAlert **04/2026**
Flutter, Dart, Firebase, Google Maps API, Firestore

- Developed a Flutter- and Firebase-based women safety application providing real-time tracking and SOS emergency-alert functionality.
- Implemented live location sharing, emergency chat, and guardian notification workflows using Firebase Firestore for real-time data synchronization.
- Designed dual user roles—Child and Guardian—with role-specific workflows and controlled access to application functionality.
- Integrated Firebase Authentication and session management for authenticated access and user-specific functionality.
- Integrated Google Maps API for location-based functionality and real-world emergency-use scenarios; managed source code using Git and GitHub.

MediCalc ANC/PNC Healthcare Mobile Application **04/2026**
Flutter, Dart, Hive, Google AdMob

- Developed and published a Flutter-based healthcare mobile application for ANC (Antenatal Care) and PNC (Postnatal Care) medical calculations, achieving 500+ downloads on Google Play Store.
- Designed a responsive and user-friendly interface for medical calculations and implemented Hive local storage for efficient offline data management.
- Integrated Google AdMob for application monetization and optimized performance, usability, and user experience through iterative testing.

EDUCATION

Parul University **2023–Present**
Integrated MCA – Cybersecurity and Forensics *Vadodara, India*

CGPA: 8.10

Kerala Public School, Kadma **2022–2023**
12th Science – PCMB *Jamshedpur, India*

Percentage: 68.00%

CERTIFICATIONS

Salesforce Administrator and App builder — Simplilearn
Google Cybersecurity Professional Certificate — Coursera
NPTEL Elite Certificate — Data Structures and Algorithms Using Java

ACHIEVEMENTS

- Earned an **TrailHead 25+** plus badges, Score over **25000+**
- Earned an **NPTEL Elite Certificate** in Data Structures and Algorithms using Java.
- Solved **200+ Data Structures and Algorithms problems** across LeetCode and GeeksforGeeks.
- Ranked among the **Top 3 coders in the institute on GeeksforGeeks** based on coding performance and problem-solving.
