PROFESSIONAL SUMMARY

Final-year Integrated MCA student with hands-on experience in Flutter, Dart, Firebase, Firestore, Firebase Authentication, RESTful APIs, SQLite, Git and GitHub. Experienced in developing cross-platform mobile applications with responsive and adaptive UI, Flutter widgets, state management, local storage, authentication, API integration and performance optimization. Published a Flutter healthcare application on the Google Play Store with 500+ downloads. Strong foundation in Object-Oriented Programming, Data Structures and debugging.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, Cross-Platform Development, Flutter Widgets, Material Design, Responsive UI, Adaptive UI
State Management: Provider, Riverpod, BLoC, GetX
Backend APIs: Firebase Authentication, Firestore, Realtime Database, RESTful APIs, JSON, Google Maps API, Third-Party API Integration
Databases: SQLite, Hive, MySQL, Firestore
Programming: Java, C, OOP, Data Structures and Algorithms, Problem Solving
Tools Development: Git, GitHub, Android Studio, Visual Studio Code, Google AdMob, Platform Channels
Software Engineering: Clean Code, Modular Development, SOLID Principles, SDLC, Agile, Debugging, Version Control

PROJECTS

MediCalc ANC/PNC Healthcare Mobile Application **2026**
Flutter, Dart, Hive, Google AdMob

- Developed and published a Flutter healthcare application on Google Play Store, reaching 500+ downloads.
- Designed a responsive UI for ANC (Antenatal Care) and PNC (Postnatal Care) medical calculations and integrated **Hive** local storage.
- Integrated Google AdMob for monetization and optimized application performance and user experience through iterative testing.

PinkAlert – Women Safety Mobile Application **2026**
Flutter, Dart, Firebase, Firestore, Firebase Authentication, Google Maps API

- Developed a Flutter/Dart cross-platform application with real-time location tracking and SOS emergency-alert functionality.
- Implemented Firebase Authentication and Firestore for secure access, real-time synchronization, location sharing and guardian notifications.
- Integrated Google Maps API and role-based Child/Guardian workflows while managing source code using Git and GitHub.

DevPulse – GitHub Profile Repository Explorer App **2025**
Flutter, Dart, REST API, GitHub API

- Developed a Flutter-based developer profile dashboard integrating GitHub REST APIs to retrieve and display user and repository data.
- Implemented asynchronous API calls, JSON parsing, Dart model classes, search functionality, loading states, and API error handling.
- Structured the application using separate UI, service, model, and widget layers for maintainable and reusable code.

BMIGlow – BMI Calculator Mobile Application **2024**
Android, Java

- Built a **Flutter mobile application** for Body Mass Index calculation with an interactive and responsive user interface.
- Implemented Stateful Widgets for dynamic input handling and real-time BMI result generation.
- Applied Flutter UI development practices to provide a responsive and user-focused mobile application experience.

EDUCATION

Parul University **2023 – Present**
Integrated MCA – Cybersecurity and Forensics Vadodara, India
CGPA: 8.10

Kerala Public School, Kadma **2022 – 2023**
12th Science – PCMB Jamshedpur, India
Percentage: 68.00%

ACHIEVEMENTS

- Successfully deployed **MediCalc ANC/PNC Healthcare Application** on the Google Play Store.
- Solved **200+ Data Structures and Algorithms problems** across LeetCode and GeeksforGeeks.
- Ranked among the **Top 3 coders in the institute on GeeksforGeeks**.
- Earned an **NPTEL Elite Certificate** in Data Structures and Algorithms Using Java.
